## FUTURE CRIME WEBINAR SERIES

*presents*

### AI and Criminal Law Enforcement

Tuesday **16 of May 2023** at **16h - 19h00** CEST – **Online**

[Click here to join the meeting](#)

You need not ask “ChatGPT” to find out that artificial intelligence is no longer something of the future. AI is our present. Intelligent “learning” machines are becoming more and more reliable, and they can be fruitfully employed in a number of societal areas, including criminal justice enforcement. We are progressively moving from the times where machines would simply allow humans to store and search in large quantities of data (“big data”), to the times where machines use the big data themselves, discover and learn new patterns, and even apply their standards and criteria to traditional activities and decision-making contexts. This is particularly the case of investigative activities, where AI applications open new frontiers in policing, both at a preventative and reactive level.

As it often happens, the advent of new opportunities brings about new – and greater – risks. AI applications are not necessarily as rationale and neutral as they might appear, and they might endanger some classic fundamental rights, from the right to equal treatment to liberty rights, and even fair trial and presumption of innocence.

**FACE Scientific Committee:** Lorena Bachmaier Winter (Universidad Complutense de Madrid); Pascal Beauvais (Université Paris 1 Panthéon-Sorbonne); Michele Caianiello (Alma Mater Studiorum - Università di Bologna); Carsten Momsen (Freie Universität Berlin); Michele Panzavolta (KU Leuven)

**KU LEUVEN**

This 2<sup>nd</sup> UNA Seminar intends to reflect on this tension between new opportunities and new threats generated by AI applications.

### **PROGRAMME:**

16:00 – 16:15      **Opening Remarks of the Chair (Prof. Carsten Momsen)**

16:15 – 17:30      **AI, PREVENTION AND POLICING**

*Prof. Matthias Wienroth, Northumbria University – ‘AI and new dynamics of policing’*

*Lore Rooseleers, Donatella van Biervliet, KU Leuven – ‘The use of AI in Belgian local police forces and the impact of technology on the formation of suspicion among field officers’*

*Dafni Stampouli, Europol - ‘AI for LEAs’*

*Prof. Pascal Beauvais, University Paris I Panthéon-Sorbonne – ‘AI and Olympic games in France’*

17.30-17.45      **Debate**

17:45-18:45      **AI AND HUMAN RIGHTS**

*Prof. Lorena Bachmaier, Complutense University Madrid – ‘Algorithmic justice and reasonable individualized suspicion’*

*Dr. Anna Mosna, KU Leuven – ‘AI and threats to the presumption of innocence’*

*Dr. Giulia Lasagni, University of Bologna – ‘The AI potential in defensive strategies’*

*Laure Baudrihayé-Gérard, Solicitor – ‘Banning predictive policing? The European discussion’*

18:45 – 19.00      **Debate**

**FACE Scientific Committee:** Lorena Bachmaier Winter (Universidad Complutense de Madrid); Pascal Beauvais (Université Paris 1 Panthéon-Sorbonne); Michele Caianiello (Alma Mater Studiorum - Università di Bologna); Carsten Momsen (Freie Universität Berlin); Michele Panzavolta (KU Leuven)
