

"Our ambition is to become an important source of innovative ideas and inspiration for Una Europa and, more generally, European universities."

The Future UniLab Steering Committee

FUTURE UNILAB

The Future Uni... what?

Co-funded by
the European Union

The Future University Lab (Future UniLab)

FUTURE UNILAB

A think-tank led by the Jagiellonian University which challenges the Una Europa ecosystem in order to enhance innovative ideas and inspiration throughout Una Europa and European Universities.

It is an open and borderless space for strategic reflection, innovation and experimentation in relation to the university of the future, which generates a unique inter-university environment.

Our mission? Re-thinking the University of the Future.

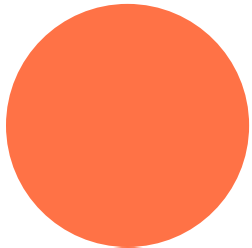

What is the Future UniLab?

FUTURE UNILAB

Aims

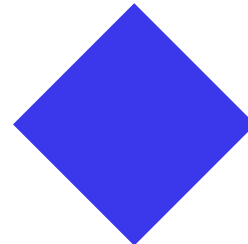

To become an autonomous thinking zone

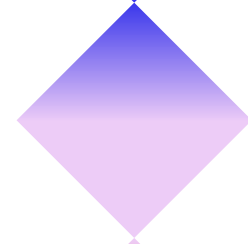

To become an important source of innovative ideas and inspiration

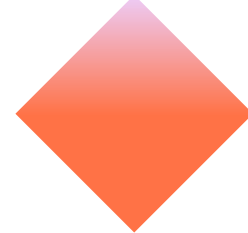

Goals

Experiment with various methodologies and instruments

Integrate the Future UniLab with the Una Europa ecosystem

Serve as a reflective, creative, and inclusive space

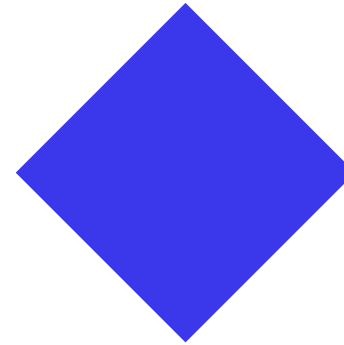

The Future UniLab Uniqueness

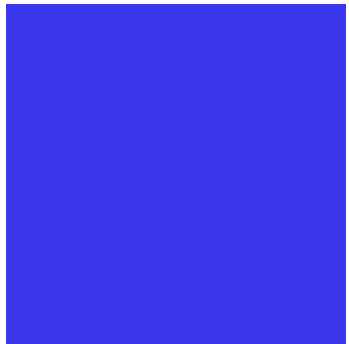

FUTURE UNILAB

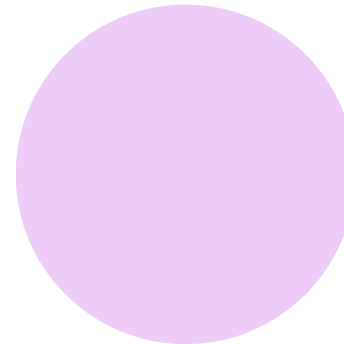

Innovative solutions and proposals based on the out-of-the-box methodology.

Inclusion of people with different backgrounds and qualifications which allows for a diverse environment with diverse ideas.

Improving the Una Europa environment through the different challenges and opportunities.

Developing ground-breaking tools and models for cooperation in European Higher Education.

The impact of our work

FUTURE UNILAB

Our role is to initiate and stimulate discussion. We leave the implementation of specific solutions to the different Working Groups, Clusters, and Self-Steering Committees. Our task is to inspire and provoke thought, even with creative elements like an animated poem or a cocktail metaphor.

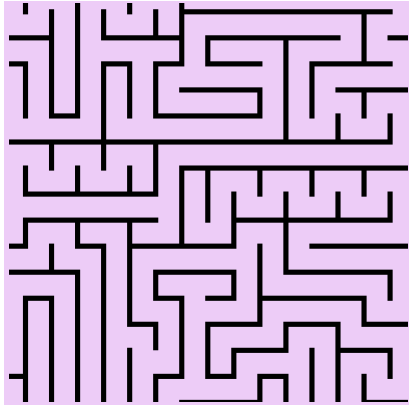

1. Envisioning reports inspired the creation of our position paper, “The European University of the Future”.
2. This paper, in turn, inspired some ideas in the Una Europa 2030 Strategy.
3. The concept note on Open Science developed by Future UniLab was part of the outputs of Una.Resin.
4. The Visionary Report “Sustainability vs. Mobility” is being used in the “Sustainable Academic Mobility” training offered to academic staff at the Jagiellonian University.

The Future UniLab Structure

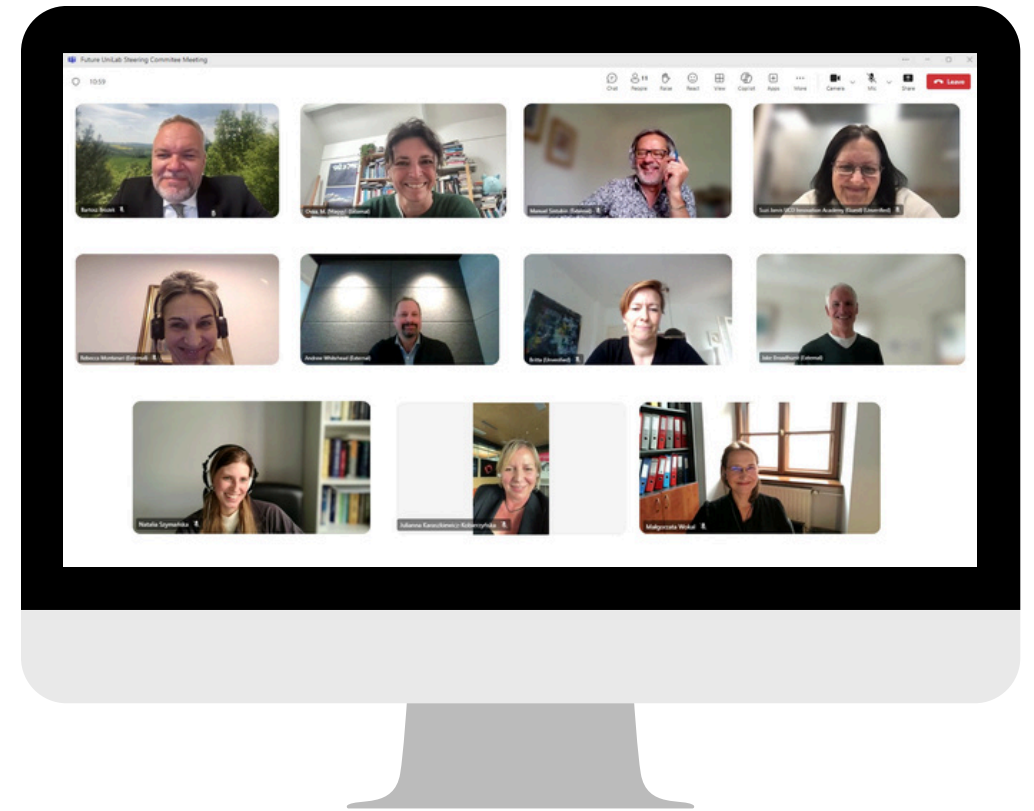

FUTURE UNILAB

Steering Committee

One representative from each Una Europa partner university nominated for a term of 4 years plus a member of Una Europa Governance and Student Board. Its role is to:

- ◆ Oversee the importance of the Future UniLab.
- ◆ Adopt the Future UniLab's long-term strategy.
- ◆ Develop and adopt annual action plans.
- ◆ Select the challenges and opportunities.

Meet our Steering Committee

FUTURE UNILAB

Prof. Bartosz Brożek, Vice-Rector for University Development, Work Package Lead Future UniLab and Una.Futura Project Lead, Uniwersytet Jagielloński w Krakowie.

Jake Broadhurst, Global partnerships - Senior Advisor, Chair of the Future UniLab Steering Committee The University of Edinburgh.

Britta Piel, Head of Unit: Center for International Cooperation, Division International Affairs, Freie Universität Berlin.

Prof. Rebecca Montanari, Full Professor in Information Security, Alma Mater Studiorum - Università di Bologna.

Prof. Ana Otto, Professor of English and Didactics, Universidad Complutense de Madrid.

Prof. Mateusz Hohol, Professor of Psychology, Director of the Copernicus Center for Interdisciplinary Studies, and Leader of the Mathematical Cognition and Learning Lab, Uniwersytet Jagielloński w Krakowie.

Eloïse Raoul-Roirant, Una Europa Project Officer, Communications Lead and member of the Student Engagement team, Université Paris 1 Panthéon-Sorbonne

Melissa Plath, Project Manager and Una.Futura Project Lead, Helsingin yliopisto/ Helsingfors universitet.

Maggy Ovaa, Una Europa Senior Local Lead, Universiteit Leiden.

Prof. Manuel Sintubin, Professor of Geodynamics, KU Leuven.

Deirdre Kilbride, Una Europa Communications Manager, Una Europa Central Team Representative.

Romane Deseez, Political Science student at Université Paris 1 Panthéon-Sorbonne, Una Europa Student Board Representative.

The Future UniLab Structure

FUTURE UNILAB

Fellows

Senior Fellows: with their diverse professional backgrounds, they provide guidance and input for the realisation of the Future UniLab Steering Committee's long-term strategy, its development and actively contribute to addressing the challenges and opportunities it faces.

Fellows: includes researchers, teachers, professional staff members or students, who may be appointed to work in the Visionary teams or Design teams.

The Future UniLab Structure

FUTURE UNILAB

Management Team

Future UniLab Manager

Assists the Steering Committee, coordinates the activities of the think-tank and liaisons with the other Una Europa bodies.

Assistant Managers

Provide administrative support to the Future UniLab Manager as well as support the dissemination and visibility of information (and outputs) of the Future UniLab of the think-tank within and outside Una Europa.

Ideas Lab & Design Desk

FUTURE UNILAB

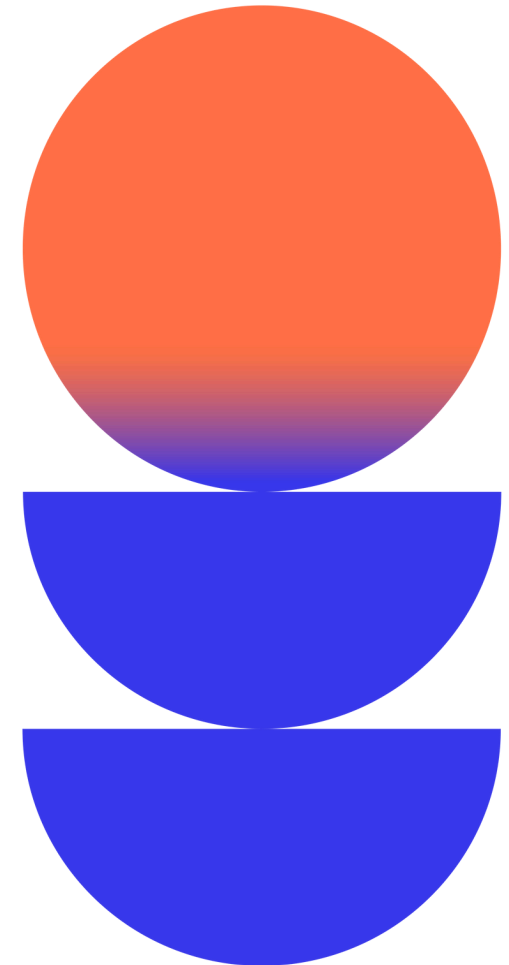

Once the challenges and opportunities are selected, they are handed to the Visionary teams.

Fellows who are appointed to work freely on one challenge or opportunity, receive the name of Visionaries. They are specialists from within and outside of academia who shall offer innovative solutions to the problems.

The output (the Ideas Lab) produced can be a:

- Concept note
- Report
- Prototype
- Position paper

Once the Visionaries present an idea, the Design team takes the lead by assisting the relevant Una Europa bodies in the implementation process by providing consultation, advice, and feedback.

The Future UniLab Challenges and Opportunities

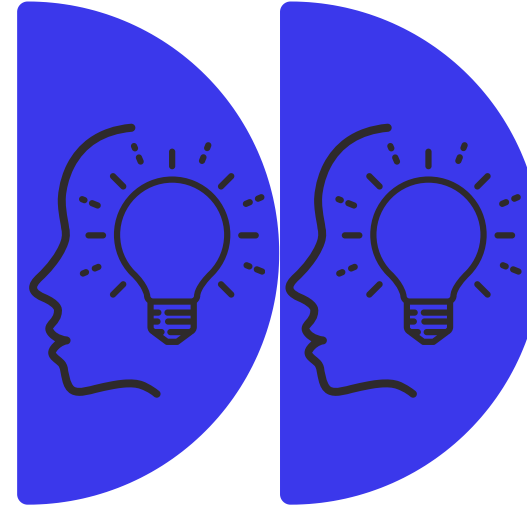

FUTURE UNILAB

Challenges

Fundamental problems for
the future of universities.

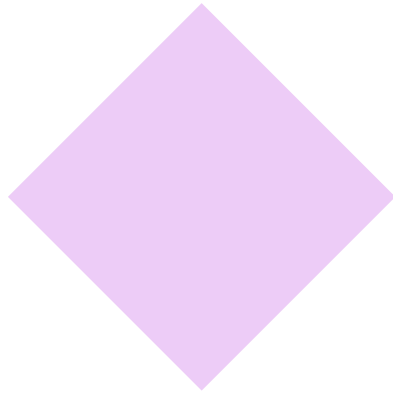

Opportunities

Circumstances potentially
enabling rapid changes.

Selection of challenges and opportunities

FUTURE UNILAB

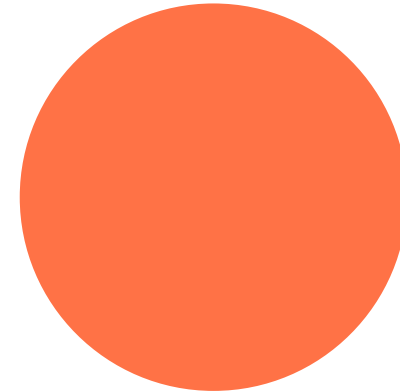

Complexity

Needs to contain complex and fundamental issues in the context of the future of universities.

Relevance

Relevant for the future of Una Europa.

Resourcefulness

Resources need to exist to tackle the given challenge/opportunity.

2024: Taking Values Seriously

FUTURE UNILAB

Sustainability vs. Mobility

The “versus” in the topic given to this visionary team is evident if one looks at greenhouse gas emissions caused by mobility. However, sustainability is much more than climate protection. Instead of turning Mobility against Sustainability the visionary team looked for ways to reconcile the two. Read through their report [here](#).

Relevance of Universities

Speaking about the relevance of universities in the future one needs to leave the beaten path of traditional methodology and use tools which prompt imagination and help to see the issues involved from different, often unorthodox perspectives. Check their toolkit for thinking [here](#).

Being Human in a Digital World

What does it mean to be human in these digital worlds? How can our humanness be reinforced, re-envisioned, or expanded? The visionary analysis can be found [here](#).

Learning, Values and Impact

The University of the Future aims to impact society by developing a comprehensive institutional vision that enhances both student personal development and societal advancement. The factors required to accomplish this vision can be found in the visionary report [here](#).

Examples of other identified challenges and called for solutions

FUTURE UNILAB

How to integrate the universities with their ecosystem - locally, nationally and internationally?

The cocktail university - wealth in diversity and inclusion.

How can universities balance the need for international academic mobility with the urgent call for sustainable practices and reduced environmental impact?

The Una Forest concept aims at offsetting the environmental impact of academic travel by supporting sustainable reforestation efforts.

Which core values should inform the University of the Future to avoid the binaries of the traditional ivory tower and rigid managerialism?

Anti-Kafka Taskforce, which delivers the most critical messages about the useless tasks or unnecessary complexities which shift the universities away from their actual aims.

Want to see all the proposals of our Visionaries?
